15 Passenger Trains, Daily Competitive
Freight Rates, Agriculture High
School, Lithia Drinking Water and
CHEAP LAND
Burkeville Land & Development Co.

TOBACCO OUTLOOK; SHORT CROP TALK

(Continued From First Page.)

crop has been or will be set out, and it remains to be seen whether the seasons will be favorable or otherwise. If unfavorable the crop will, of course, fall short accordingly. In any event, the crops in the Old Belt and in the sun-curing territory will be late this year, and will have to take some chances with possible early frosts next fall.

The weather being so hot and dry the farmers are unable to handle what they have on hand, so sales this week were not so good as last week.

Our buyers are anxious for stock, and all grades of tobacco are very active with prices strong.

With a good season for handling tobacco the remainder of the crop would be sold in a few weeks. Quotations this week:

Leaf, common (damaged)	5.50	6.50
Leaf, good	7.50	8.50
Leaf, medium	7.50	8.50
Leaf, good	10.00	11.50
Leaf, medium	10.00	11.50
Leaf, good	12.00	14.00
Leaf, wrappers	15.00	25.00

Danville Tobacco Report.
Danville, Va., May 27.—Only about 3,000 pounds of loose tobacco were sold at the warehouses this week. In consequence of the very small receipts, and that the crop is now practically delivered, some of the largest buyers have withdrawn from the market for the season. The warehouses will remain open for the sale of loose tobacco until June 15, but so very little business will be done that they might as well be closed.

There has been no rain, except very slight, for some time, and the plants, the plants are becoming overgrown in the beds, which have to be watered to keep alive. Another week of such weather will make the situation, as far as the tobacco crop is concerned, very serious.

The farmers have their land in perhaps better condition for planting than in perhaps years, and on the first rain every plant possible will be set.

There is more disposition on the part of dealers to enter the redried market for speculative account, and some fairly large deals have been recently made, evidently in view of unfavorable crop conditions.

GREAT RAILROAD WORK IN SOUTH

Vast Projects of Improvements
and Extensions Now Under
Way.

(Special to The Times-Dispatch.)

Baltimore, Md., May 27.—Railroad construction, the betterment of exist-
ing roads, the projection of new lines,
are all showing a very marked increase
in activity in many parts of the South,
as indicated by reports to the Manu-
facturers' Record, which is summing
up some of the more important under-
takings recently reported, states that

of the \$20,000,000 which the Missouri
Pacific has raised, \$15,000,000 will be
expended for improvement work, in-
cluding rolling stock and rails. The
Missouri, Kansas and Oklahoma Rail-
way is reported as having secured
\$7,000,000 in France, and is pushing the
extension of its line through Oklahoma
into Texas.

The Western Kentucky
Electric Railway Company is to be
incorporated, to build 215 miles of elec-
tric road to connect a number of Ken-
tucky points, the capitalization to be
\$2,000,000. The Kentucky Traction and
Terminal Company, of Lexington, Ky.,
is projecting large extensions of its
electric railway system, with a
view to ultimately building about 250
miles of new electric road.

The electric railway system of Rich-
mond and Norfolk have combined, with
capital stock, common and preferred,
of \$20,000,000, in addition to existing bond
issues, the combination securing, in
addition to about 210 miles of electric
railway, electric and gas lighting sys-
tems in Norfolk and Richmond. Frank
J. Gould, of New York, who is at the
head of this movement, already con-
trols a number of important water-
powers in Virginia and North Carolina,
some of which are being developed to
furnish electric power for commercial
purposes, as well as for these railroads.

A combination involving the railroads
of New Orleans, Birmingham and a
number of other Southern cities is re-
ported as under way, and if effected
will represent a capitalization of \$50,
000,000 or more.

The Southern Railway Company an-
nounces that it will immediately dou-
ble track its road for thirty-two miles
between Atlanta and Gainesville, this
in addition to other large betterment
work under way. The Seaboard Air
Line, as recently announced, is plan-
ning to double track 150 miles of road
between Hamlet, N. C., and Norfolk,
and is at the same time making im-
provements to other parts of its
system.

In North Carolina there is remark-
able activity in the building and pro-
tection of railroad enterprises, both
steam and electric. Many new lines
are proposed in that State, and a num-
ber are now under construction. Al-
together, about 2,000 miles of new
steam and electric road are in con-
templation in North Carolina. The plans
are not limited to any particular sec-
tion of the State, but are well distrib-
uted over every portion of it. While
some of this projected mileage will
not materialize for some time to come,
yet a great deal of actual construction
work is under way, giving to that State
great railroad construction activity
present and projected, than it has had
for many years.

Throughout the South and Southwest
there are increasing evidences of a
revival of activity in railroad build-
ing, both by new enterprises and by
existing roads. The full realization of
the limitless freight-carrying possi-
bilities of the South, which the whole
country is now gaining, and the way
in which Southern railroads have in-
creased their earnings of late years,
are combining practically to compel a
vast increase in the transportation fac-
ilities of the South. Though there
have been many adverse factors militat-
ing against the raising of new capital
by Southern roads, yet the way in
which they are meeting the situation
and are endeavoring to provide in-
creased facilities for the rapidly ex-
panding trade of this section indicates
that the financiers who control South-
ern railroads are at last awakening
to the opportunities in this section.

Beginning to provide the facilities
which will enable the managers of
Southern roads to show results some-
what commensurate with the natural
advantages of their territory.

It is, however, a good plan to have
some of the various poultry remedies
on hand, so that in case you have some
particular trouble among your birds
you can give them something at once.

I went to a place one time when they
wer kept a thing in the line of house
medicines and I saw a man who was
from a town where they were kept
get such things if they needed them.
When you need a simple remedy you
need it badly, and it is the same thing
with your birds. If they get sick they
need the medicine right away. Be pre-
pared for emergencies by having var-
ious remedies on hand.

nothing short of an inspired prophet
can ever tell what City Hall folks
will do next.

Merit Tells After All.

Anyhow, at the present writing
there are at least 800 Richmond-made
electric motors in operation within
the city limits, and this speaks very
well for Richmond's way of encour-
aging home enterprise, but Richmond
business folks are always strictly busi-
ness and sentiment cuts mighty little
with them. I guess the reason they
are so liberally patronizing home
enterprise in this instance is that
home enterprise is proving itself su-
perior to competition. And
yet I gathered from the Richmond
Electric Company's management, after
the pumping apparatus had been put
in operation, the remarkable fact that
at least 75 per cent. of their sales are
made in the North; up in New Eng-
land, in New York State, in the Middle
West and in the Canada trade territory,
and there they compete with Northern
electrical foundries and shops, while
some Southern folks outside of Rich-
mond are hurrying off up North, when-
ever they want an electric motor and
any other electrical apparatus. Funny,
isn't it?

However, this Richmond shop has
no idea of being downed by any lack
of home appreciation, for they are
reaching out for new worlds to con-
quer. They are already selling goods
in Brazil, Cuba, Porto Rico and Mex-
ico, and only a few days ago they
started a mail order to capture Canada.

Truly, Richmond industry and com-
merce are getting to be known
all over the world, and it is just such
enterprises as this Richmond Electric
Company that are making the great
town under the stars known to the
wide world, known in an in-
dustrial and hustling way.

More Corn Talk.
Corn growing is a live subject always,
and cheering news about its increase in
the South are always interesting. Here are
different reports, but they will bear repetition.
The increase in acreage in corn in the
Southern States was 2,800,000 in 1909
over 1908, and 2,250,000 over 1909. Out
of 7,100 demonstrators from 1909, 1908
reports were obtained, twenty-three demon-
strations secured 100 bushels per
acre in yield of corn during the 1909 season,
and 88 demonstrations equalled or exceeded
when weather conditions were not all
favorable for the growth of corn.

Prevention is about the best way of
doctoring the birds, if you can call it
that. If one is careful about the litter
that is kept dry and clean it will mean
much to the health of the birds, and the
ground side of your coop gives the
poultry house over directly throughly
and see if there are any such places.
